KNOWLEDGE/STAFF EXCHANGE PROGRAMME FOR MANAGERS IN RESEARCH INFRASTRUCTURES

Join our Knowledge/Staff Exchange Programme

The purpose of Rltrain knowledge/staff exchanges is for managerial staff from European Research Infrastructures (RI) to develop managerial and leadership expertise in areas that are new to them.

How to manage stakeholders? And to build an high-profile community? Learn that directly at IMG (Prague)

Topic: Stakeholder Management and Community Building

Date: 22nd - 25th May

The proposed staff exchange focuses on stakeholder management and community building in the field of biological and medical imaging, but can be easily transferred to any field.

The staff exchange is divided into three parts. First part will be devoted to presentations and discussions with staff working in the Czech-Biomed hub at the Institute of Molecular Genetics (IMG). The second part covers participation in meetings of the Czech-Biomed steering committee and the Czech-Biomed advisory committee and individual talks with selected members of these committees. The third part consists of a wrap-up session at IMG, during which the participants will discuss with the IMG team the outcomes of the staff Exchange and possible future cooperation.
